

Hurst, TX (October 16, 2018) – Follow-up to house fire at 609 Circleview Dr. S. – Atmos investigated the house for any natural gas leaks, none were found outside or inside the house. Gas appliances in the area of the fire were checked and none were found to be faulty. Further investigation found that the resident had been improperly filling a small LPG tank from a larger LPG tank. When fire units initially arrived on scene, the resident was extinguishing a fire from a LPG tank that he had rolled out to the street from the garage and the LPG tank had a home-made connection using a rubber hose and hose clamps.
